

MonsGeek M1 Customization Pre-order Event

Lead-time: 30-45 days

MonsGeek is committed to providing readily available and in-stock aluminum products.

However, this approach limits our ability to offer a wide range of customization options upfront, focusing instead on providing just the most popular choices.

To broaden the customization possibilities within our product lineup, MonsGeek is considering hosting a pre-order event. During this event, users will have the opportunity to purchase a MonsGeek M1 with various options, including:

- Different case colors (E-White is confirmed to be available)
 - Weights
 - Side RGB LED strips (yes, it's included)
- and more...

What sets this apart from a typical group buy?

1. Swift manufacturing time (with a lead time of 30-45 days or even shorter).
2. The flexibility to cancel your order at any time before shipment.

Rest assured, we will continue to maintain a consistent supply of our regular M1/M1W lineup in Black, Purple, and Silver. This event is designed to offer even more choices to our valued users.
